

IS STILL FIRM ABOUT SIGNING HYDRO BONDS

Mayor Says the City Must Have All Cards On the Table.

SMOKE NUISANCE

Deputation Complains of Conditions Around the Greening Works.

His Worship Mayor Bookner, before going away on a severe cough, this morning, said he would not sign the affidavit signing the bonds of the Hydro Radial until the city knows where it stands. "Not until they lay all their cards on the table will I consent to consider the matter," said His Worship.

"I hope some men will not agree to sign it to-night if I am unable to be there, and I am afraid I will not be able to attend to-morrow. I have voted on the question in the scheme are now discussed."

The Council will be addressed by Mr. George Davis, the solicitor. The public are invited.

A delegation from Ward 4 presented a signed motion authorizing from the H. Greening Wire Works, appeared before the Board this morning.

It was reported that three great stocks continually, so the adjacent houses also resulted in appearance and damage.

One of the residents stated that he was painting his veranda last summer, and, instead of purchasing lead black paint, he used white paint and allowed the soap to eat him and he had a beautiful drain.

Controller O'Brien reminded the Board that the Morton Soap Works cannot do much harm and the Greening Works could do little.

Controller Davis suggested that the Board submit the matter to the City Council at its next meeting.

The Board approved of the taking over of the former military buildings on the St. Scott property for use.

On a suggestion from the Soldiers' Benevolent and Consolatory Fund, the meet the controllers in camera to discuss the insurance scheme, a storm in a teacup was created.

Atchison thought that he would not be a party to such a meeting, but that the heads of the various organizations, together with some of the complainants, to place their exact desires before the Board. The Board, however, did not open one, was the decided decision of the controller.

"Don't you think I am such a nub- chainer to let them put anything over me or do you?" said the Mayor.

The Board will meet again at 10 a.m. on Friday afternoon.

"The controllers and as many mem- bers of the council who can afford it will be present at the Hydro Convention on Feb. 5th in Toronto.

Major Roberts held a deposition of His Worship Mayor Bookner, for a grant to enable the local regiments to carry on. The speaker stated that the grant was cut off last year, none were given, and that though the government would not make a grant for the upkeep of the band and regiment, he would not be asked to pay expenses.

Col. Robertson stated that the 13th团 has been financed about \$7,000.00 as a contribution to the war effort.

Controller Atchison thought that if the Government grant is insufficient to carry the regiment the city should be asked to contribute the usual \$250.00 grant, although it has been the custom for the past 25 years.

His Worship, however, flat off-

ered to consider the estimate as pre- sented for the year.

A deputation from the Horticultural Society also made application for a grant of \$250.00 for the year.

Reports were given by secretary and treasurer, the latter showing a balance on hand of \$100.00.

A general committee for the organization meeting of the Provincial Chapter to be held at First United Church, Barton, Delegates will be present to carry on the work.

All I.O.D.E. members are in- vited to attend, but only those holding office in the chapter will be entitled to vote. Nominations for officers for Municipal chapter were held.

Mr. Webster, the president, stated that the application, the organiza- tion was granted a small contribution for the \$250.00 grant requested.

E. CULLAN FINED

The Magistrate's Conviction Was Confirmed.

Edward Cullan, who appeared before Judge Gould in Criminal Court, last week, charged with shooting with intent to kill Ross McCallum, a gas man, was fined \$100 with costs in the alternative of three months in jail, Judge Gould confirmed the police magistrate's finding.

The trial grand jury had found the gun and cash box or \$5,000 in two sureties of \$2,500 each were re- quired of Reg. Sheriff Smith, who was found guilty recommended for sentence. Heidey Suberer appeared for the prisoner.

Sergeant Joseph charged with fraud, pled not guilty and was remanded.

NORIS LOSES SUPPORT.

(Canadian Press Wire.)

Winnipeg, Feb. 3.—After being an active supporter of the Noris Government, it is later learned, Capt. E. J. Wilson, member for Aspinwall, caused something like a scandal in the city yesterday evening, as he came out with a declaration of independence of party affiliation.

SOCIETY

Mrs. and Mrs. Arthur Porter, Jarvis Ont., announce the engagement of their only daughter, Beatrice Eileen, to Mr. Leonard A. Blayne, of this city. The wedding is to take place Saturday, Feb. 15. The marriage to take place quietly late in February.

The regular meeting of the Lieutenant-Colonel Bertram Hooper Chapter, I.O.D.E., will be held in the Y. C. A. Auditorium, 10 a.m. on Saturday at 1 o'clock. As officers will be elected at this meeting all members are urged to attend, and are requested to return tickets.

At the above held last evening in the Lyceum by the Cathedral Home Circle there was a very large attendance. The members of the association were there. Miss Gardner, supervisor of the committee in charge, for the musical evening which was given a short programme including a number of soloists, the prima donnas being Miss Gushman and Mr. Neaman.

The annual afternoon of cards, under the auspices of the Masonic Credit Association, I.O.D.E., will be held at the Hotel Alexandra Academy, on Thursday, Feb. 5. Playing will commence at 3 o'clock sharp, and a short musical programme will be given, the following ladies kindly consenting to sing: Mrs. W. P. Brennan, Mrs. Isley, Mrs. Craige Wright, Miss Shanks, and Miss Nash. Refreshments will be served. Table reservations may be had by phoning R. 4526.

SENIOR CATHEDRAL GIRLS.

On Saturday evening, the senior members of the Girls' Gymnasium Class, of Christ's Church Cathedral, who have been "carrying on" at the Y. W. C. A. Auditorium, will have a special reception in the "Y" board room to the young women and friends of the organization.

Miss Mary Gushman, supervisor of the committee, will be present.

One of the girls, Mrs. Gushman, said that she was painting her veranda last summer, and, instead of purchasing lead black paint, she used white paint and allowed the soap to eat him and he had a beautiful drain.

Controller O'Brien reminded the Board that the Morton Soap Works cannot do much harm and the Greening Works could do little.

Controller Davis suggested that the Board submit the matter to the City Council at its next meeting.

WEDNESDAY, FEB. 4, 1920.

PLENTY OF POWER

The members of the Board of Control who were the means of bringing in Chief Engineer Gaby, of the Ontario Hydro-Electric Commission, before the City Council last evening did the city a good service. There was much misgiving among the citizens as to the ability of the commission to carry out its program. It is now clear that the resignation of Mr. Gaby, before the Board of Trade's previous visit, did not do much to allay public anxiety. Last night, however, Mr. Gaby was in a position to give the aldermen every assurance that the commission would have plenty of power to run the railways by the time they were ready to be operated. It will be for the Board of Trade to decide whether it would be wise to have the three roads over which the roads were controlled, that by 1921 the first unit of the Chippewa Canal would be completed, and that by the following year the whole undertaking would be completed, thus releasing \$40,000,000 of power, making in all a total of \$90,000,000 horsepower.

As a matter of fact, he said, the railroad would consume such electric power while in operation.

The members of the council were favorably disposed to his explanations, and the Hamilton-Elginby-law will get its third reading at the next meeting of the council. As Mr. Gaby said, it should be two or three years before the radial roads will be in operation, perhaps longer, than does not seem to be any reason for hurry in the signing of the six million dollar bond for the Toronto-St. Catharines road. The bonds will be

NO LIQUOR REFERENDUM

The Provincial Executive of the Dominion Alliance, after consideration, has come to the conclusion that it would be unwise to ask for another referendum on the liquor question, on the grounds that it is not sure that the Federal legislation would be sufficient to secure a bone-dry Ontario and of the expense of holding the referendum. That is the opinion of the Legislature, and the power to enact a law that will make the Province as dry as it could be wished. The master will be further considered at the annual convention of the Alliance to be held next month. The Provincial Government will be asked to pass the necessary legislation. Legislation is desired for the control of the rich man's cellar, the supplying of the poor man's bottle, and the securing of all items needed for sacramental, medicinal and industrial purposes; the concentrating of the entire control of the sale and distribution of liquor in the Board of License Commissioners and persons the board may appoint.

As Mr. Drury has already announced, that his Government will endeavor to make the liquor laws as strict as possible, there is no doubt that the suggestion of the Alliance will be favorably regarded by him. There is no need to make a second appeal to the people if the Legislature has sufficient power to make prohibition as restrictive as desired.

SOME DRURY PROMISES

In his address at Burlington last evening Premier Drury made one or two interesting statements. One of them was that his Government was to introduce legislation that would prevent returners from politics. He should send a copy of the cure to the Dominion Parliament. He also declared that it was his Government's intention to make the motor license fees finance entirely the new roads that are to be built. Mr. Drury did not say as much as that.

EDITORIAL NOTES

Product and buy at home is a good cure for the exchange drop.

OTTAWA IS ENJOYING DAYLIGHT SAVING

The coming summer. She has some sense.

THERE IS NOW A SUSPICION THAT ONE OF THE THREE MEN HANGED IN MONTREAL

FOR MURDER WAS INNOCENT, AND WAS A 17-YEAR-OLD BOY.

AS WE EXPECTED, THE HON. MANNING LABOR'S STORY OF HIS LIFE AND LABORS IS SOMETHING DIFFERENT FROM THAT RELATED BY MR. DEWEY.

The promised investigation by the Board of Commerce into the alleged Hamilton grocers' combine will be welcomed by the grocers. We understand.

THE HANDICAP

(Vancouver Sun)

A GRAVE STATEMENT

According to dispatches from Ottawa, the grocers' combine for the Vancouver drydock has been held up through impeding changes in the cabinet. Meanwhile, public money is being spent on the part of the government for support of unemployed men who would much prefer to be earning their living. They are not alone. This drydock is indeed only one of many illustrations of the injury which the country suffers by having a weak government in office. Men who are

of course, why the Liberty League should oppose him: Mr. Raney has been instrumental in introducing prohibition legislation. He has taken a strong stand on the question of race track gambling, and he promises to be active in the prosecution of all combines and other trade evils. But we do not see that these should place him wrong with the general public or even with the farmers. True, Mr. Raney is a liberal, but there are many in public life, and many outside the pantyline.

FIRE PRECAUTIONS

Although Dr. Roberts, our Health Officer, has issued precautions or instructions to the citizens as to how to avoid the fire should it break out in the building, there may be no harm in publishing the following circular that has been issued by the Nova Scotia Fire Department, as follows:

1. Infusoria is a germ disease transmitted by:

(a) droplets from loud talking, coughing, sneezing;

(b) drinking and eating out of infected utensils improperly cleaned;

(c) the use of handkerchiefs and towels;

(d) direct contact in kissing.

2. Children are people who carry the germs in their throats after an attack, or who carry the germs, not necessarily in their throats, but in the milder or ameliorative cases play a large part in spreading disease. There appear to be no cures.

We are now informed that at the next session of the Union Government a franchise and also a redistribution bill will be passed. With a view to checkmate the farmer movement, it may be that the rural constituencies will suffer a reduction in their voting strength. That can be done by making the unit of voting strength the same in the counties as in the cities. This is unusual, but in Ontario the month has 29 days, and as February 1 was a Sunday, the month began and ended with 28 days. This has not happened since 1850, or 40 years ago, and it will not happen again for 86 years.

Mr. J. A. Ellin, Director of Housing in Ontario, says that there are sixty municipalities in the province which have no fire department. A number of houses have been constructed and about 1,300 are under construction, and will shortly be completed. The loans for these amount to about \$4,000,000. The plans of these various municipalities for next spring contemplate the construction of about 3,000 more houses. In all it is probable that the province will be asked to loan an additional \$20,000,000.

6. A person attacked by infusoria should go to bed, seek for doctor and advice, and as long as advised by the physician.

STATE OF THE COUNTRY

The January monthly report issued by the Canadian Bank of Commerce says that: Reviews of business conditions by recognized authorities indicate unanimity of opinion as to the necessity of a greater volume of production from our own raw material in order that the prosperity of the nation may be prolonged and continued. It is also evident from these reviews that there is abundant work for all available hands and that any complaint of lack of work come from those who find difficulty in getting employment in the field of agriculture.

More men are now available for work in the forests and the mines, but the demand for factory help remains insistent. It would then appear that the new year opens auspiciously.

The people as a whole, despite the extravagant purchasing of luxuries, have been saving. The savings deposits in the banks, the number of new insurance policies issued, purchases of securities, payments of taxes and of debts generally, all show a marked increase. Capital is still being expended in addition to the purchase of raw materials, which is likely to high standard of efficiency under the inspiration of war effort. Mining prospects are being more intelligently exploited and agriculture and animal husbandry are receiving keener attention than heretofore. All this indicates that production will be more than sufficient to meet political or social friction.

The elements of prosperity are all present in the present industries and agricultural situation if the people will get down to business. Big wages, short hours and a general prosperity are the incentive to produce, and stagnation is apt to cause men to seldom produce as much in seven or eight hours as they can in ten, and when men quit work because they are making more money than they need production suffers. No one wants anyone to work under such hours, nor does anyone want labor reasonably remunerated. But, as the prosperity of the country depends on production, nothing should be allowed to interfere with that.

MIGHT BE AT BETTER TASKS.

(Woodstock Sentinel-Review.)

What is more important than a union of insurance companies? A forty-year-old boy who cannot get a skate?

GUESS

(Belleville Intelligencer.)

Round steak a short time ago dropped to twenty-five cents a pound; now it is quoted as high as thirty.

With the coming of the Forward Movement or the Best Friend?

ALLIES WILL AID.

(Cleveland Plain Dealer.)

The Germans take a solemn oath never to forget their lost cause. And they show signs of forgetting, the Allies will help them remember.

RADICALS IN UNION

(Philadelphia Record.)

Mr. Gomersal has stated his opinion of Bohemia, and it is an opinion such as would be expected from the leader. Gomersal is a man of high standard of efficiency under the inspiration of war effort. Mining prospects are being more intelligently exploited and agriculture and animal husbandry are receiving keener attention than heretofore. All this indicates that production will be more than sufficient to meet political or social friction.

The elements of prosperity are all present in the present industries and agricultural situation if the people will get down to business. U.F.O. MEMBERS OF LEGISLATURE HELD A CAUCUS

Hint Given That Raney May Get Seat in E. Wellington.

PATRONAGE

U.F.O. County and Provincial Directors Also Met.

Toronto, Feb. 4.—U. F. O. members met, in caucus yesterday afternoon, close Mr. A. Hicks, of Centralia, representative of South Huron, as the party whip. They also considered who of their number should have the honor of moving the r. to the speech from the throne. While the final choice will be left to Premier Drury, Rev. Mr. H. C. Riley, of Galt, P. O., North Victoria, will likely be selected. The Labor group will be asked to choose one of their number second the motion, and the same will be done at their caucus next Monday. Mr. W. A. Crockett, M. P. P. for South Wentworth, mentioned as the probable choice.

In addition to discussing the foregoing matter, the Farm members considered the proposed program to be introduced by the Government, the ever-present patronage problem, and the finding of a seat for Attorney-General, Mr. J. Morrissey.

At the conclusion of the caucus Mr. Hicks said that it was important that a statement might be expected to-night from the committee which has the matter under review, and Dr. Gillies defended the cause adopted by the Branch, which he said, was similar to that followed in the United States.

The Jersey breeders were congratulated by Live Stock Commissioner, Mr. J. Morrison, for their success in the competition for the Eastern Member for East Wellington, might resign and that Mr. Riley will take his place.

Mr. Riley will contest a seat in the U. F. O. Mr. Riley was elected in a recent contested contest, having a majority of about 100.

While the government has declared that it has abolished patronage there were evidences at yesterday's caucus that the 45 Farmer members are not all of them of the opinion that they should be consulted to some extent, at least, in the making of appointments to the various ridings.

The criticism that has been heard in the civil service about a one-man Civil Service Commission did not receive much attention at the meeting.

One of the objections is that the present system is likely to develop a centralized service, while adhering to its policy of no patronage, cutting somewhat the duties of Mr. Morrison, and leaving the civil service more or less dead.

There was a large turnout of members at the meeting, and Mr. J. Morrissey, M. P. P. for South Waterloo, who ranks as a Labor representative.

At the end of the session, Hon. F. C. Biggs, Minister of Agriculture, was also in attendance.

It was decided that definitive steps were not taken because Premier Drury was being obliged to leave before the caucus was convened, to attend meetings in Burying.

In addition to the members, there were present Mr. R. H. Halbert, former President of the U. F. O.; E. Burns, President of the U. F. O., and Col. Z. A. Fraser.

With the members-elect meeting, the U. F. O. County and Provincial directors were also in session in the morning, and the session adjourned at noon.

U. F. O. in the provincial election was also in attendance. Hon. F. C. Biggs, Minister of Agriculture, was present.

Other members present were Mr. J. Morrissey, M. P. P. for South Waterloo, and Mr. E. Burns, President of the U. F. O., and Col. Z. A. Fraser.

The memorandum suggested that careful supervision be made of the expenditure of public money; that non-productive public works should not be undertaken, and unnecessary officials should be kept in with services rendered and with due regard to the economy of the public service.

Discussing patronage, the memorandum suggested that the present system be thoroughly reorganized with a view to a better system of public appointments and condemned the present one-man Civil Service Commission as dangerous and likely to develop a centralized service.

THE OLD DOG LENT TO STRANGERS

(The Dog's Opinion of It)

I'm lent to a party of strangers

Who came here last night by the rail,

And I sick and sorry about it

From my nose to the tip of my tail.

Oh, how could my dear master lend me

To any such fakir as these!

Why, they don't know a snipe from a swallow,

Or the difference 'twix tame and wild geese!

Why, when they gazed at the elm boughs

Pencilled clear 'gainst the gray autumn sky,—

I heard one chap ask the fool next him

"If woodcock's in general root high?"

When I gaze to a point in a thicket

They called me "a lazy old brute";

And up got a ruffed grouse before them

And nobody ready to shoot!

They did get one partridge sitting

And then, what a hubbub!

"Hi! fetch him—oh, catch him!"

Hi! sick him there, Ponte! Soo! Soo!"

They've got me at last! I just know it!

Thank heaven, it's but number ten!

Here goes across lots to my kennel.

You'll catch me with that bunch again!

—R. GOURLAY.

BREEDERS OF JERSEY CATTLE

Steps to Keep Out Tuberculosis.

Plans for a Publicity Campaign.

Toronto, Feb. 4.—A lively debate, incited by Rev. J. Fleming, Toronto, arose at the annual meeting of the Jersey Cattle Breeders' Association with regard to the matter of establishing tuberculosis-free accredited herds in Canada under the supervision of the Board of Agriculture. The method of procedure in inspecting and treating herds of cattle submitted for inspection was discussed by Dr. Hilton, of the Health of Animals Branch, who spoke in the absence of Dr. T. G. T. Gillies, of the Branch. Mr. Fleming declared that the testing of the cattle and issuing certificates could best be done as well by a qualified veterinarian as by any inspector appointed by the Branch, and a lot of trouble would result if the work of the Branch would be a hardship and expense to breeders, he claimed, and the cost of treatment would be added to the tape of the Branch, the better.

Other members of the Club spoke in favor of the action proposed, and Dr. Gillies defended the cause adopted by the Branch, which he said, was similar to that followed in the United States.

The Jersey breeders were congratulated by Live Stock Commissioner, Mr. J. Morrison, for their success in the competition for the Eastern Member for East Wellington, might resign and that Mr. Riley will take his place.

Mr. Riley will contest a seat in the U. F. O. Mr. Riley was elected in a recent contested contest, having a majority of about 100.

While the government has declared that it has abolished patronage there were evidences at yesterday's caucus that the 45 Farmer members are not all of them of the opinion that they should be consulted to some extent, at least, in the making of appointments to the various ridings.

DRUGGISTS PROTEST

Against Regulations of Pharmacy Department.

Ottawa, Feb. 3.—Morphine and cocaine, valued at \$5,000, was seized by detectives 10-day when they raided a bank in rear of 126 Clinton street.

Riley was preparing capsules of narcotics, the detectives say. He was arrested from the bank, which had been held up for two hours.

There were 100 capsules of morphine and cocaine, valued at \$5,000, which he had been holding in his possession, especially to fit the young people for usefulness and pleasure, and not for medical purposes.

Under the heading of education, the memorandum suggested that the requirements first given to the common people to fit the young people for usefulness and pleasure, and not for medical purposes.

DOM. ALLIANCE WANTS NO NEW REFERENDUM

Temperature Forces Look to
Ontario for "Bone Dry"
Legislation.

GOV'T HAS POWER

Executive Doubts Applicability of the Federal Bill.

Toronto, Feb. 4.—A largely attended meeting of the Provincial Executive of the Dominion Alliance was held at the alliance office, Lumsden Building, Toronto yesterday. Representatives were present from many districts throughout the province. The President, Mr. Charles E. Scott, presided.

The principal business before the meeting was the consideration of the report of the special committee appointed at a previous meeting of the association to consider the question of legislation. This committee has received from Mr. John S. Ewart, K. C., of Ottawa, a large number of questions regarding the use by the province of the Dominion "bone dry" legislation. The committee reported that the importation of liquor, and the whole matter had been carefully considered and a number of legal findings made.

The committee reported against asking for another vote, as provided by the bill, and in favor of returning it to its applicability to the Province of Ontario; the expenses involved in calling a special meeting of the legislature, did not stop direct legislation, and the bill, outstanding features being, that it did not deal with the manufacture; would not stop direct legislation, and that it did not prohibit distilleries to private houses of liquor ordered through a Montreal agent, did not prohibit the sale of liquor for medicinal, commercial and manufacturing purposes.

The committee further stated its opinion that the Provincial Legislature had power to enact legislation, a practice which it will be well to make the province "bone dry."

On resolution, this part of the report from the committee was adopted on the motion for convention for consideration, at which time, the whole matter will be decided by the temperature committee in convention as proposed.

Upon recommendation of the committee, the executive re-directed the position of the Alliance, and decided that efforts should be made at the approaching session of the Legislature to have the bill, as amended, embodied in the bill, embodying the utmost measure of prohibition the province has power to take.

The matter of details regarding the provisions of each legislation in the different provinces, the executive committee, the Alliance, and decided that efforts should be made at the approaching session of the Legislature to have the bill, as amended, embodied in the bill, embodying the utmost measure of prohibition the province has power to take.

The matter of details regarding the provisions of each legislation in the different provinces, the executive committee, the Alliance, and decided that efforts should be made at the approaching session of the Legislature to have the bill, as amended, embodied in the bill, embodying the utmost measure of prohibition the province has power to take.

The suggestions made, look in the direction of the securing of adequate facilities for the securing of all liquor needs for medicinal, commercial and industrial purposes, the concentrating of the entire control of the sale and distribution of liquor in the hands of licensed commissioners, and the powers the board may appoint.

The members also considered the programme for the annual convention, which is to be held in Muncie, Hall, March 9, 10 and 11.

Every Girl Who Earns Her Living Read This?

Very complete in her physical relations to life, disease and death, every woman who works, and she must therefore guard jealously anything that tends to injure and destroy her health or health.

Probably nothing is of more service than Dr. Hamilton's "Pills." Every girl and woman can employ this grand remedy with gratifying results. As a system, health and blood revitalize, no treatment gives such results.

For matrimonial happiness and health, especially if it is to be successful, every woman can employ this grand remedy with gratifying results.

As a system, health and blood revitalize, no treatment gives such results.

Weak organs are filled with new life and vitality; weakness, irregularities and the common ills are prevented.

When you feel poorly, when the head aches, feel feverish, and a desire to vomit, drink one tablet of this—take of the need of Dr. Hamilton's "Pills"; by them.

Placing the Whales.

Scientific class the whale as a mammal, but the Board of United States Commissioners at New York has ruled that whale meat is fish, for purposes of levying import taxes.

The whale meat which was the subject of the discussion was imported at Seattle, and was classified by the commissioners as "fish." It is not specifically provided for, and duty was levied at the rate of 15 per cent. The commissioners ruled that the merchandise was meat, and in a lengthy decision there was not a single argument presented that the flesh of the whale, if it is meat, is ordinarily accepted as food.

"It is meat," said the board, "so limited that we have the right to accept it as commerce, and the meat has not passed it in the domain of meat; therefore we must give it the meaning understood by ordinary people of commercial intelligence."—The Nation's Business.

SIR Gilbert Parker's Latest Novel "No Defense" Starts in the February Munsey

It is a Rare Romance and a Splendid Adventure.

A tale of the days of Revolution in Ireland—the Colonization of America.

The life of a young Irishman who thrived on war and almost died for love.

Full of Stirring Action—duels, revolutions.

Full of stirring emotions—A Great Love Story.

THE FEBRUARY MUNSEY ON SALE AT ALL NEWS-STANDS

Catching and Canning the Luscious Sardine

The little can of sardines has stood between a man and starvation on many a high sea or desert waste, and even under most favorable conditions the fish with its bones has tasted better than the finest viands when a long tramp in hunting clothes or a day of hard work has whetted the appetite to a ravenous edge.

Sardines are found in many parts of the world, and are generally supplied by marine waters, which contain millions of them. In many marine districts they are taken from the sea and converted into fertilizer, or are utilized to them, their preference to the smaller ones.

AS CANFISH IN MAINE.

In Canada, however, methods for catching the fish are used, and a great many canneries have been established along the coast. In fact, it has been said that there are more canneries than fish in Maine, while the reverse is true of the California coast, where the sardines come from the ocean and are converted into fertilizer, no attempt is made to utilize them for food.

At first the sardines are caught in the fishing tanks. These are filled with strong pickle in which the fish are allowed to remain from twenty minutes to two hours. The net depends somewhat on the fatness of the fish and the condition of the water. If the net is very fat or the weather is very cold it requires more time.

After being sufficiently "struck" in the tanks, the fish are taken out with wooden wire scoops and are sorted out with small wire scoops and thrown upon the deck of the boat. The captain of the boat then takes the fish, takes them from the baskets and lay them on the flake in rows. The fish are then washed in salt water and are filled in with galvanized wire an inch or more apart. Each flask holds from five to twenty-five fish each, or from 90 to 125 to the

lowing: When the fish arrive at the cannery they are hoisted from the collecting boat to the wharf in baskets. These baskets are carried into the cutting room, where they are suspended from overhead track. The fish are distributed along the middle of the tables, so that they are within easy reach of the cutters. They are cut up in a great variety of ways, and the cans are packed in boxes.

When the fish are packed in boxes, they are taken to the salting room and placed into a washing tank, where a man stands over the fish and uses a scoop net, washes them.

Water is then run over the fish, which is constantly changed to insure perfect results.

After being sufficiently "struck" in the tanks, the fish are taken out with wooden wire scoops and are sorted out with small wire scoops and thrown upon the deck of the boat. The captain of the boat then takes the fish, takes them from the baskets and lay them on the flake in rows. The fish are then washed in salt water and are filled in with galvanized wire an inch or more apart. Each flask holds from five to twenty-five fish each, or from 90 to 125 to the

flakes, and about ten flakes are required to pack a case of sardines.

READY FOR THE OVEN.

As soon as the fish are packed they are ready for the oven. The oven is made of the rotary kiln style, by which the fish are heated in a number of iron frames suspended from arms extending from a cylinder in the center, which is heated by gas or oil.

During the revolution, which is made slowly, the frames remain in a horizontal position. The heat is supplied by a furnace underneath.

The fish are subjected to heat for a length of time varying from four to six hours, or until they are cooked as much as possible without being discolored.

They are then taken and placed in a retort, and are then labeled and packed in cans.

When sufficiently cooled they are taken to the packing room.

The sardines are packed in cottonseed oil, mustard sauce or vinegar with spices. The spices used are generally mustard seed, allspice, cloves and nutmeg, and the amount of cottonseed oil required is first put into the cans and then the fish are placed therein, in three layers, made up front to back, and the top layer is covered with a thin layer of oil.

The small ones are packed in the quarter and the larger ones in the third. When filled, the cans have their tops soldered or crimped on, after which the cans are packed in wire baskets or boxes, and sent to the shipping room for the requisite time, after which they are cooled, dried and sent to the labeling and shipping room.

In California the sardines differ materially from that of Maine. The fish are not caught in weirs, because the current causes them to be scattered, and there are no suitable places to put weirs. Consequently the only way to get sardines is to go out and catch them in nets, which are set in the ocean.

There are two kinds of sardines, the small and the large, and the latter are especially efficient.

When the fish are caught, they are washed in salt water, and then dried.

Drying is largely done in the open air, and for this purpose the fish are arranged in wire baskets or on wooden frames or slates.

The sardines remain out for varying periods of time, depending on the usual time in favorable weather being one hour. The fish are then taken in the same baskets to the smoking house, and immersed in smoking oil.

As the oil is quite dry, much of the water is driven off by the heat of the fire.

The immersion in oil usually lasts about two minutes. The basket is then allowed to cool for a few hours.

The fish are then packed in boxes.

The French sardine manufacturer

uses two kinds of olive-oil and peanut oil, and, although they claim to use only the pure olive oil, it has been found that the American cottonseed oil finds its way to the canneries as substitute for the more expensive olive oil.

According to the report of the Bureau of Fisheries, the export figures show that millions of gallons of cottonseed oil go annually to the canneries.

The oil is used for the more expensive products and the peanut oil for soap.

LATEST SPORTS NEWS

Yellow and Black Squad Showed Poor Form But Beat Kitchener's Team

The Final Score Was 8-7--Tigers Will Have to Buck Up or Varsity Will Take Them Into Camp

Playing far under the form they showed when the beat the Toronto Dents, the Tigers just managed to win by one goal over the Kitchener senior team in an exhibition game at the Auditorium last night. The final score was 8-7. As it was not an O.H.A. fixture, perhaps the Jugglers did not try very hard but the good turn out of fans would have at least liked to see the team show something more than the bare minimum. Not only every Tiger roamed around as if he was lost. "Bill" Reid being the worst offender. Carson Cooper being brilliant in his play and Harry Reid played in a good game, he being the only one to stick to the back-checking. The wings were not put out and the situation and should have learned a lesson by seeing how the Kitchener wings were used. The only trick of the wings was loafing, waiting around for a pass. The defense was not up to scratch and would be stuck some corner when the Kitchener forwards came down the ice three abreast. Solomon and Park were the best for Kitchener. The Northern team are fast and clever stick handlers.

THE PLAY.

It just took Kitchener one minute to find the "Tiger". The forwards took the puck down the ice followed by Hillman, one of the defense men. In a series of frenzied rushes the Wings had the puck in their zone and shot it past Rheaume's knees. The Tigers were like a bunch of ants and after a few minutes of this Cooper got the puck with a bit of nice stick handling and skating, got up the ice and scored. He then beat Hainsworth with one of his speedy shots. Reiss was the next to receive a goal and he was lucky for he rubbed from behind his own right through the Kitchener defense and banged in the rubber. Hillman and Parker had a nice combination play which had the locals on their feet. The puck went to Parker who sent it to the left wing and Solomon scored. Cooper and Boyd got a bit of nice stick handling and skating, got up the ice and scored. Cooper had no trouble in beating Hainsworth. Kitchener evaded the puck and sent it to Parker who slipped the puck passed Rheaume. Solomon duplicated the fast 45 minutes and scored two goals before the period ended.

SECOND PERIOD.

The second period had no game one minute before Soloman scored for Kitchener. The Tigers, with two goal lead against them, started playing like they did in Toronto, and played all around the ice in green and white sweaters. Harry

"Scout" Reid who played a steady game all round, scored after getting the puck from Hillman. Hillman used their sub. freely in this period, Fisher, Il-rile Mitchell, Morgan and Max Soloman were present at the bench. It will be noted that the Kitchener goal tender could not handle his shots.

THIRD PERIOD.

Kitchener tried hard to even up matters in the last period and the boys were able to play during the twenty minutes. It just was the good work of Herbie Rheaume which beat them. The first half of the period saw a lot of minutes of play, when Hillman rushed down the ice and caught the Tiger defense trapping. The puck was passed to Reid and he banged the puck into one corner of the webbing. Solomon for the visitors got down and skated the puck, but Rheaume was right on the job. The last goal of the night came within two minutes of the end of the period, Solomon of the defense, had a chance to score but he missed. The Tigers had a chance to score but the puck was taken away from them. The final score was 8-7.

THE WINNERS.

If Tigers are in the same shape they play Varallo's arena night as they did in the game, they will be beaten. They were about their best, though the fans did not see the game at Toronto. The fans are wondering how the yellow and black squad ever got over the hump. Harry Reid was the only one that showed any of the kind of play the critics rave over after the game. He was the best player of the night. The defense, Reiss and Smith; Centre, Reid; wings, Cooper and Boyd.

Rheaume, Hainsworth, defenceman Kargen and Hillman; centre, Parsons; wings, Solomon and Clarke. Referee: Joe Matte.

Sporting Comment

"Hank" Woods has matched Eddie Gallagher with Ernie King, of Toronto, for an eight-round bout in the Queen City next Monday night. Gallagher is fighting in great form right now and his services are in demand. Henry is getting his boys enough fight to keep them going. The Toronto promoters have arranged a good card.

Attention, hockey fans!—"Dong" Chilman, secretary of the Tiger hockey team announced this morning that if enough people will put application for seats for the Tiger-Varsity game tomorrow night at the Auditorium, a special train will be run. It is now up to the loyal fans to get that train. A block of 350 seats will be reserved for members of the team.

The game should be on a par with that played between the Dents and Tigers last Saturday night for "Varsity" have shown their class and many Toronto fans think that they can whip both the Tigers and Dents.

The officers of the 91st regiment will play the sergeants of the 13th Royal Regiment a game of indoor baseball to-night at eight o'clock in the Armories.

In a letter to Walter Obernauer, Pete Scott, the Indian battler, expresses a wish to get a bout here with Harry Freeman, of Toronto. These two met before and had a great fight. Pete thinks that the winner of such a bout should have a chance at Frankie Bull.

Cronin Cooper is a sensible boy. The Toronto St. Pats have been after the great little wing player of the Tigers but he has given the management of the Toronto club a definite refusal that he won't make the jump. He knows that he is too light for pro-company.

Burlington is in Next Round

Beat Milton by a Score of 6-5

Toronto, Feb. 4--Coming from behind in the last period at the Arena last night Burlington overcame a two-goal lead in the last five minutes of play with Milton and notched the winning tally with only one minute to go, the game finishing 6 to 5. These teams, who formed a two-team group, previously played four games, total goals to count, and wound up on equal terms, hence the play-off here. After five games only one goal separated them so evenly were they matched, and Burlington now may

into the next round of the O.H.A. intermediate series.

Owing to the absence of Blanchard, the two teams, who had been not sanguine going into the contest, as Warry in the net was playing, had to play a game. He stopped play, dropping any mail in the very first period. He was rather awkward in his style and fair to say he was not up to scratch to get it at him, but he had the faculty of locating it. He was led down easily though. The Mississauga lads were off in their shooting.

SCATTERING "THE BEANS." Both sides sat back looking for an overtime contest, but Cole, of Burlington, and Warry, of Milton, were to put the ball in the net. The former did it with one minute to go by beating Barrett with the winning goal.

Blanchard, of Milton, Warry, defense, and W. G. Colborn, center, Cole, left wing, Galloway, left wing, Wilton, right wing, Walker, Sheppard, Hillman, center, Farlow, right wing, Brush, left wing, Buck, Sube, Kentier, Ford, Peacock. Referee: Steve Val.

BUSINESS, COMMERCIAL AND FINANCIAL SECTION

MARKETS and FINANCE

LIQUIDATION IN THE GRAINS

Bear Side of Market Has An Inning.

Leading Corn Holders Are Cash Handlers.

(Supplied by Tammessee, Farwood & Co., Merchants Bank Bldg.)

Chicago, Feb. 4.—The grain trade was bearish last night and had more to back that side than at any time in the year. It was the belief that liquidation has set in and in rye and hard wheat the market has turned to the favor of lower prices as most operators saw it. It has decided moderately that it is now necessary for the market to induce large purchases except for a quick upturn. The railroad situation has been a factor in the mind of the factors to watch for the next two months.

Those who watch the corn market clearly say that its action yesterday substantiated the belief that there was relatively little sentiment in the market, and that the grain holders are cash handlers who have the future bought against sales of cash grain to the extent of 3,000,000 bushels. This would indicate an estimate that about 3,000,000 bushels cash corn was sold for deferred shipment to New England.

SUMMARY.

New York, Feb. 4.—January sales of American Tobacco Co. increased \$2,300,000 over those of January 1919.

Chairman Hayes, of Republic National Committee arrived in Washington to urge quick ratification of peace treaty.

R. G. Dun report—569 commercial accounts were paid off in January with liabilities of \$7,240,622, against \$724 and \$10,732,398 respectively a year ago.

British Financiers received assurances from Holland, Switzerland and Scandinavia that their willingness to co-operate in providing funds for Great Britain to extend necessary credits to central Europe according to London despatches to New York.

Credit requirements of stock market is stated to be high banking circuit. It is reported that the recent arrangements whereby Wall Street has again been allocated a massive sum of money will not much be drawn up on bankers. Bankers however, expect cash rates will remain at the same level.

Trade in exchange carries demand sterling to 33.3-1.4 new low record. Twenty industrial 59.96; twenty railroads 52.66.

WEAKNESS OF EXCHANGE

Caused Recession in Stocks On Wall Street.

Market Unsettled and Call Money High.

(Supplied by J. G. Beatty & Co., 17 Main street east.)

New York, Feb. 4.—With pressure directed mainly against the newer oil issues the start of the selling yesterday was far from encouraging. The market spread to the standard issues, considerable real liquidation resulted. Call money almost tripled yesterday to 10 per cent. The acute weakness of foreign exchange was a contributory cause of the recession in stocks, but it was evidently of support, and no sign to warrant the prediction that bottom was reached.

The market this morning is likely to remain unsettled with perhaps a secondary wave of sales caused by further liquidation of the partly tired holders of stocks. Any purchasing should be on a scale down and should be kept to a minimum.

There may be further weakness, but on the breaks good stocks can be bought by those who are willing to hold to the end care of them.

DAYLIGHT SAVING IN OTTAWA. (Canadian Press Wire.)

Ottawa, Feb. 3.—A proclamation for the observance of the daylight saving system from May 1 to Sept. 26 will be issued by the Mayor next summer.

This was decided last night by City Council on motion of Alderman Mc Kinley.

LUMLBERMEN IN CONVENTION.

Quebec, Feb. 3.—Lumbermen are gathered in Quebec City for the annual convention of the Canada Lumbermen's Association. The line of practical work was done this morning, the early session of the delegates and officials of the association being held under the chairmanship of the preliminary organization work.

Delegates to the convention have come from all points of Canada.

BACK TO BARTERING. (Canadian Special Cable.)

London, Feb. 3.—A large delegation, representing the principal British industries, has arrived in London to discuss the question of the £60,000,000 loan which will be made in England, and the proceeds will be devoted to obtaining necessary materials, particularly timber and leather, to enable the restoration of British industries. This particular barter system has been resorted to owing to the depreciation of currency.

HYDRO POWER WILL BE AMPLE, SAYS MR. GABY

To Meet All Demands and
Leave a Good
Reserve.

RADIALS NOT SOON

450,000 Additional H. P. Be-
fore the First Cars Are
Running.

Mr. Gaby, chief engineer of the Ontario Hydro Commission, gave members of the City Council the assurance last night that, by 1922, there would be available for the municipalities in the Niagara district an additional 450,000 horse-power over what is now, making a total of about 650,000 horse-power which the Commission felt would be more than enough to take care of the future even if the population of this part of the Province were increased by two million people. Mr. Gaby also gave an assurance on another interesting phase of the matter when he said that Hydro would not be asked to take over the 200 miles of radials now in existence. The 200 miles of radials which the Commission intends operating within the next few years, will not be built until there is a total of 12,000 horse-power. "The talk, therefore, that no Hydro would be available for radials was entirely unfounded," said Mr. Gaby. "It is the first unit of the Chippawa development scheme should be in operation by the fall of 1921."

As a consequence of the satisfaction by United States companies with the progress of the Niagara project, Mr. Gaby said, when the project was started it was estimated that it would take 45 years to complete it, while the actual time taken has been 15 years. The progress that had been made thus far, Mr. Gaby said, the Commission felt confident that the first unit of the new hydro system would be available in the summer of that year and in operation by September. This canal, for instance, was not available in 1919, contracts had been awarded to a manufacturer for the delivery of two large turbines, one of which was delivered in 1921, under parity to do so. By July or August of 1922 an additional 250,000 horse-power will be available over the 175,000 horse-power which the municipalities in the Niagara district now use at present. Although the exact amount of power which would provide it was estimated, an additional 450,000 horse-power by the fall of 1922 over what was being generated at present, the Ontario Hydro Commission was this ample to provide for all future needs; indeed, Mr. Gaby said, "I think it would be more than enough to meet the commercial and industrial power requirements of the Niagara district." The Commission's estimate figured that it took about one horse-power to keep one workman busy. About ten persons, he said, were provided for by one horse-power, so it was evident that the population of the Niagara electric could be increased a good deal before the additional power would be adequate to look after everyone.

The principal trouble has been due to limitation in power, we are not responsible for the latter," said Mr. Gaby.

Coming to the all-important question of Hydro Radials, Mr. Gaby said that the hydroelectric misconception that not enough Hydro power is available to operate these lines. "The Ontario Hydro Radials have been very favorably received by people of Central Ontario. He would like to remind Hydro critics that it would be possible to generate twelve thousand horsepower or a peak load of fifteen thousand, to operate these lines, if they were to be put into operation. Hydro Radials did not consume anything like the power consumed by steam turbines. About 100 horsepower per mile was a conservative estimate. The Ontario Hydro Radials have been able to generate from 2,000 to 2,500 horsepower. No hydro radial would ever be operated for some years yet. The Chippawa scheme would have its first unit completed and the second unit started before any radial would be running. Even if the Commission started to build radials now, it could not possibly have any of those roads running for two or three years yet, so the public, I believe, should be reassured. Hydro Radials were going to agree to the present short-term contract, but the many difficulties in the autumn of 1919, Hydro Radials, he said, would not be in operation until after the Chippawa scheme was completed, probably not for two years yet, probably three.

Meanwhile, the Commission had been unable to get this power to supplement its present inadequate supply. Whether this supply was discontinued or not, the public, in consequence, the Hydro wanted to get additional power to relieve the shortage. "We are not responsible for the first unit of the Chippawa scheme completed.

Admittedly, Trostle wanted to know if the shortage would be bad next winter, providing weather conditions were as severe as this. Mr. Gaby said, "I think we are going to get additional power, temporarily, but he could not hold out much hope of getting it before the Chippawa scheme was completed. The West Ice conditions in the history of the Falls have been terrible.

Controller Davis wanted to know if there was no ice trouble, how much of the power would be available for? Mr. Gaby said that the producing plant at the Falls had never gone over capacity. There was a safe limit, however, beyond which the generating capacity was concerned. There was a reserve for the municipalities provided for in the contracts, and help application to fill in the necessary application form.
